Notes:

- You will need a ½ inch PVC pipe for the base of the blaster.

  They are this size:  (if you print at normal paper size)

  The pipe I used was 34 inches long (84 cm).

  You may may want a slightly longer pipe for better stability.

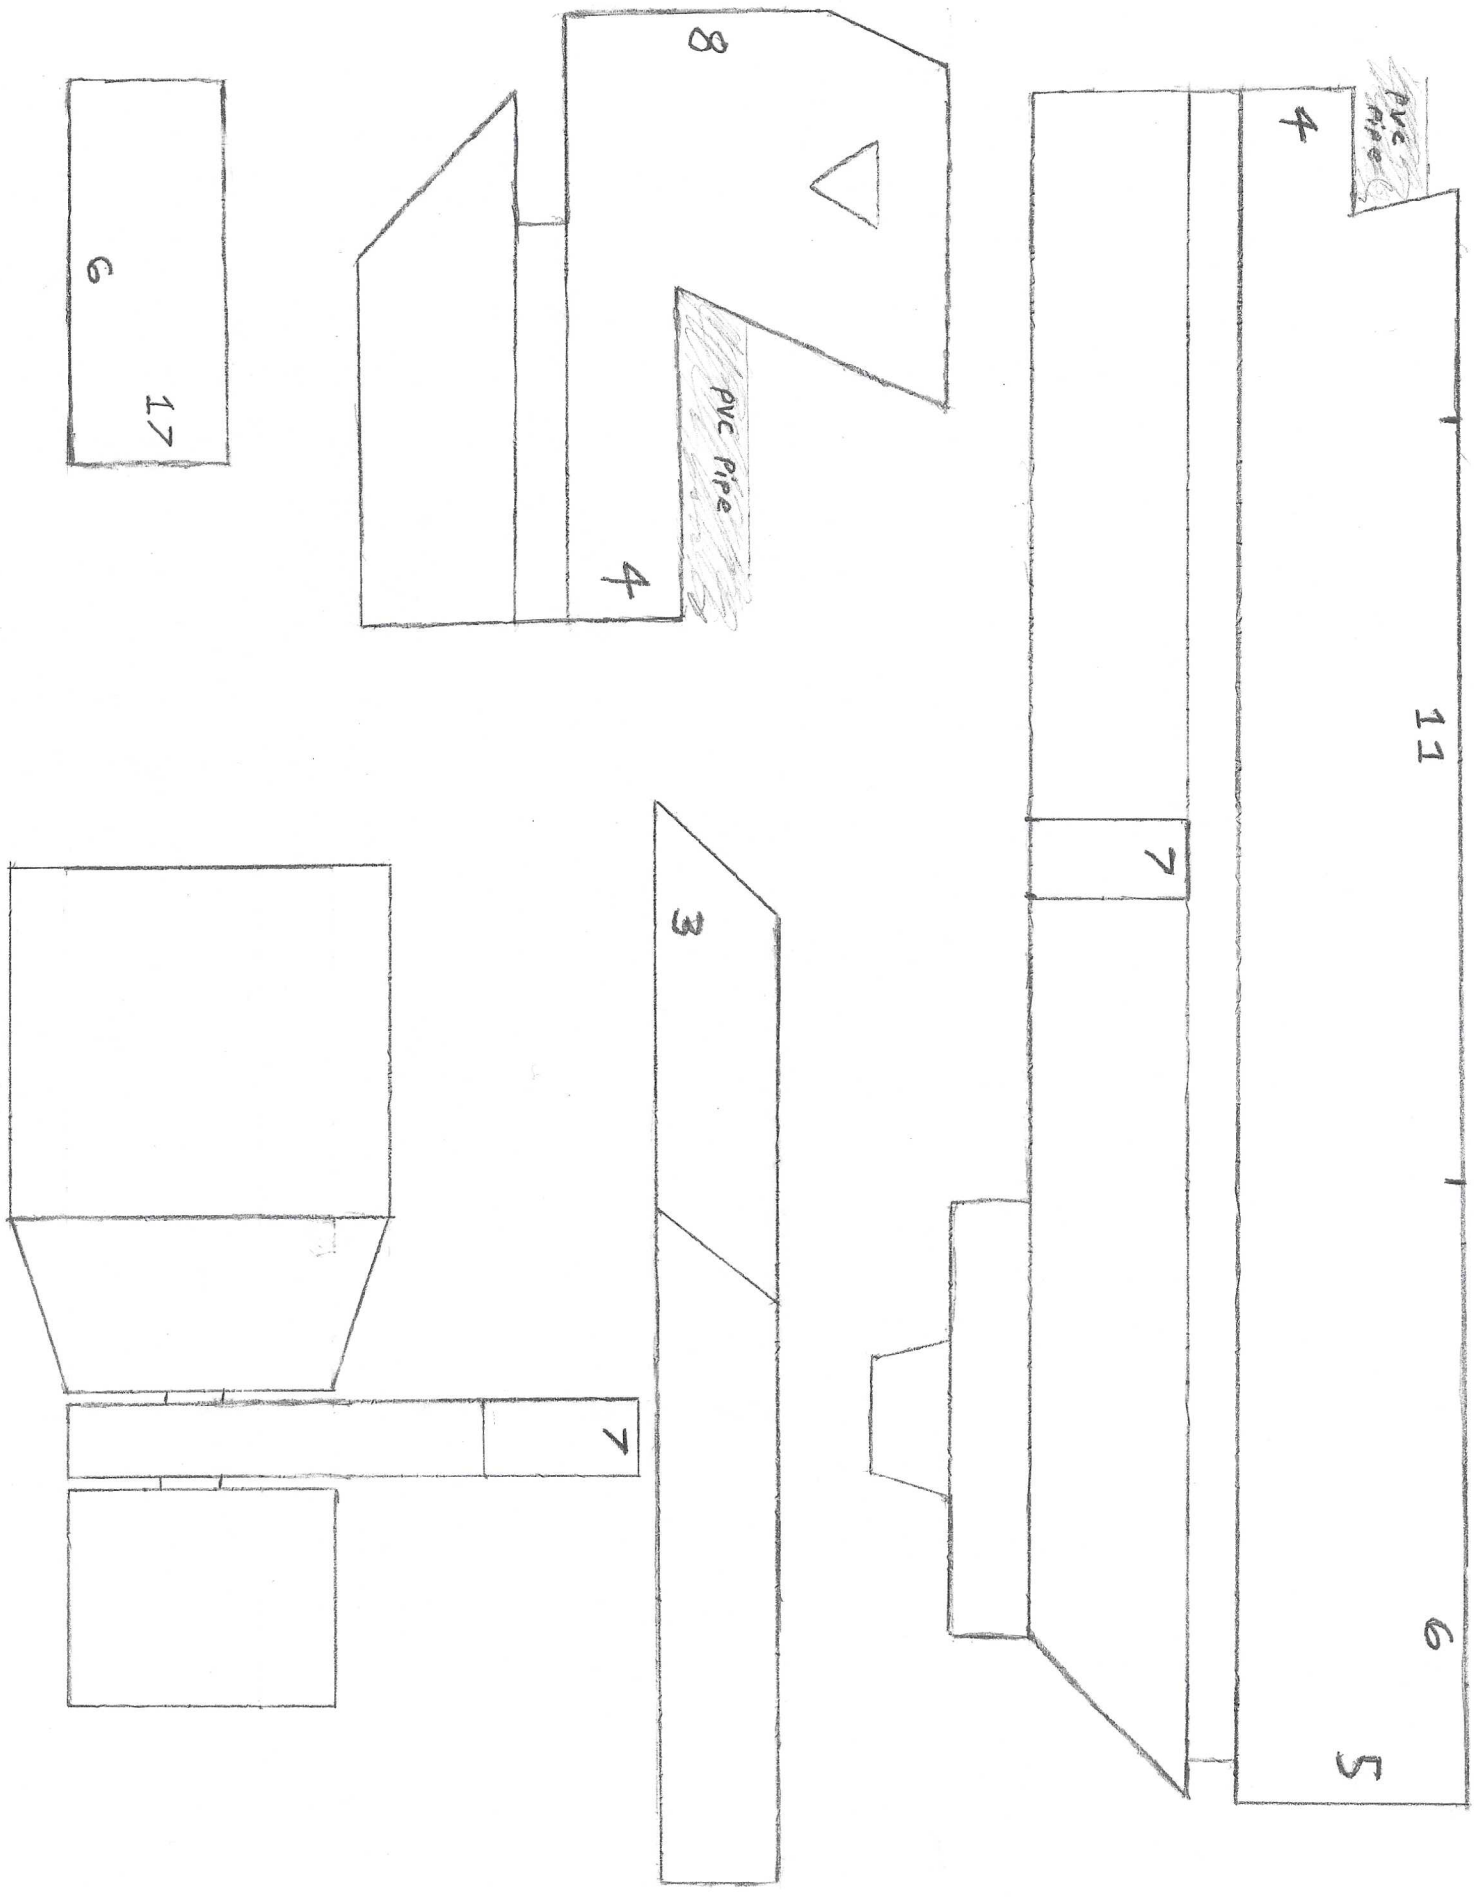

- My blaster in total is 48 inches long (122 cm).
- It is based off of The Clone Wars TV show, not the movies!
- I painted it all black with Plasti-dip and brushed grey paint onto it afterward for a "worn" look.
- I used a magnate to make the clip removable.
- It is NOT 501st approved!

Have Fun! - Ryzer
